1 Safety Precautions

1.1. General Guidelines

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

1.1.1. Leakage Current Cold Check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between $1\text{M}\Omega$ and $5.2\text{M}\Omega$.

When the exposed metal does not have a return path to the chassis, the reading must be ∞ .

Figure 1

1.1.2. LEAKAGE CURRENT HOT CHECK (See Figure 1.)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a $1.5\text{k}\Omega$, 10 watts resistor, in parallel with a $0.15\mu\text{F}$ capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

2 Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Caution

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

3 About lead free solder (PbF)

Note: Lead is listed as (Pb) in the periodic table of elements. In the information below, Pb will refer to Lead solder, and PbF will refer to Lead Free Solder. The Lead Free Solder used in our manufacturing process and discussed below is (Sn+Ag+Cu). That is Tin (Sn), Silver (Ag) and Copper (Cu) although other types are available.

This model uses Pb Free solder in its manufacture due to environmental conservation issues. For service and repair work, we suggest the use of Pb free solder as well, although Pb solder may be used.

PCBs manufactured using lead free solder will have the PbF within a leaf Symbol  stamped on the back of PCB.

Caution

- Pb free solder has a higher melting point than standard solder. Typically the melting point is 50 ~ 70°F (30~40°C) higher. Please use a high temperature soldering iron and set it to 700 ± 20°F (370 ± 10°C).
- Free solder will tend to splash when heated too high (about 1100°F or 600°C).

If you must use Pb solder, please completely remove all of the Pb free solder on the pins or solder area before applying Pb solder. If this is not practical, be sure to heat the Pb free solder until it melts, before applying Pb solder.

- After applying PbF solder to double layered boards, please check the component side for excess solder which may flow onto the opposite side. (see figure below)

Suggested Pb free solder

There are several kinds of Pb free solder available for purchase. This product uses Sn+Ag+Cu (tin, silver, copper) solder. However, Sn+Cu (tin, copper), Sn+Zn+Bi (tin, zinc, bismuth) solder can also be used.

4 Input signal that can be displayed

*Mark:Applicable input signal for Component(Y,P_B/C_B,P_R/C_R)and HDMI

Signal name	Horizontal frequency(kHz)	Vertical frequency(Hz)	Component	HDMI
480i(525)/60Hz	15.73	59.94	*	*
480p(525)/60Hz	31.47	59.94	*	*
576i(625)/50Hz	15.63	50.00	*	*
576p(625)/50Hz	31.25	50.00	*	*
720p(750)/60Hz	45.00	60.00	*	*
720p(750)/50Hz	37.50	50.00	*	*
1080i(1125)/60Hz	33.75	60.00	*	*
1080i(1125)/50Hz	28.13	50.00	*	*

Note

- Signals other than above may not be displayed properly.
- The above signals are reformatted for optimal viewing on your display.

5 Self-check function

When phenomena like "the power fails from time to time" or "the video/audio fails from time to time" can not be confirmed at the time of servicing, the self-check function can be used to confirm the occurrence and to limit the scope for the defective circuits. Also, when "the power fails from time to time", display on the screen can be used to confirm the occurrence and to limit the scope for the defective circuits.

Any programmed channels, channels caption data and some other user defined settings will be erased and return to factory setting.

5.1. How to access

5.1.1. Access

Produce TV reception screen and, while pressing [VOLUME-] button on the main unit, press [OFF TIMER] button on the remote controller unit simultaneously.

5.1.2. Exit

To exit, turn off the TV.

5.2. Screen display

Display	Ref No.	Description	P.C.B.
E2	IC1102	EEPROM	A-Board
MSP	IC2001	TV Sound Power Amplifier	A-Board
Tun	TU101	Tuner	A-Board
FPGA	IC4004	LCD Driver and Display Control	A-Board
HDMI	IC5004	HDMI Processor	A-Board
CEC	IC5001/IC5002	CEC Control	A-Board

6 Chassis Board Layout

Board Name	Function
A-Board	Main (AV connector, AV Switch, Tuner, Audio & Video Processor, MCU, LCD Driver, LVDS)
V-Board	Remote Receiver, LED, B.A.T.S.
G-Board	AV3, Headphone jack
AP-Board	Power Supply, Power Regulator
Power Unit	Power (AC/DC) None serviceable. Power Unit should be exchanged for service.
Control Panel Unit	None serviceable. Control Panel Unit should be exchanged for service.

7 Disassembly for Service

7.1. Pedestal ass'y

1. Lay down the main unit so that the rear cover faces upward.
2. Remove the fixing screw (2 pcs).
3. Remove the hinge cover.

4. Remove the fixing screws (4 pcs).
5. Remove the pedestal ass'y.

Note: Push the Pedestal ass'y into the slot of the MTG with an angle, avoid the Pedestal ass'y knock and break the cabinet.

7.2. Rear cover

1. Remove the fixing screws (12 pcs for 26" or 14 pcs for 32" and 3 pcs).
2. Remove the rear cover.

Note for re-installing:

7.3. Rear Support MTG (Left and right)

1. Remove the rear cover. (See 7.2)
2. Remove the fixing screws (4 pcs).
3. Put Rear Support MTG lightly, while moving upper.

7.4. AC cord

AC cord (26")

1. Remove the rear cover (See 7.2) and the rear support MTG. (See 7.3)
2. Take out the groove of the AC cord from the slot of the Tuner cover.
3. Disconnect the couplers of AC cord.

The direction of taking out

AC cord (32")

1. Remove the rear cover (See 7.2) and the rear support MTG. (See 7.3)
2. Take out the groove of the AC cord from the slot of the Tuner cover.
3. Unlock the cable clumper.
4. Disconnect the couplers of AC cord.

7.5. Tuner Cover Ass'y

1. Remove the rear cover (See 7.2) and the rear support MTG. (See 7.3)
2. Remove the fixing screws (2 pcs).
3. Remove the Tuner Cover Ass'y.

7.6. Power Button Bracket Ass'y

1. Remove the rear cover (See 7.2) and the rear support MTG. (See 7.3)
2. Remove the fixing screws (2 pcs).
3. Remove the Power Button Bracket Ass'y.

7.8. Power Supply unit

1. Disconnect the couplers (P301~AP2 and P302~AP1).
2. Remove the fixing screws (5 pcs).
3. Remove the Power Supply unit.

7.7. Control Panel Ass'y

1. Remove the Power Button Bracket Ass'y. (See 7.5)
2. Remove the fixing screws (2 pcs).
3. Disconnect the coupler (AP6).
4. Remove the Control Panel Ass'y.

7.9. A-Board

1. Remove the Tuner Cover Ass'y. (See 7.5)
2. Remove the fixing screws (11 pcs).
3. Disconnect the couplers (AP1, AP2.....AP7).
4. Remove the A-Board.

Fix the A shield case to A-Board as follow:

Caution

Fix carefully shield case to shield clip (ZA4001-ZA4008, and ZA4030).

7.10. AP-Board

1. Disconnect the couplers (AP1-AP6).
2. Remove the fixing screws (4 pcs).
3. Remove the AP-Board.

7.11. G-Board

G-Board (26")

1. Remove the Rear Cover. (See 7.2)
2. Disconnect the couplers (G1 and G2).
3. Remove the fixing screws (2 pcs).
4. Remove the G-Board Ass'y.

5. Remove the fixing screws (2 pcs).
6. Remove the G-Board.

7. Remove the fixing screws (2 pcs).

8. Remove the Shield case.

5. Remove the fixing screws (2 pcs).

6. Remove the G-Board.

G-Board (32")

1. Remove the Rear Cover. (See 7.2)
2. Disconnect the couplers (G1 and G2).
3. Remove the fixing screws (2 pcs).
4. Remove the G-Board Ass'y.

7. Remove the fixing screws (2 pcs).

8. Remove the Shield case.

7.12. V-Board and Led Panel

1. Remove the fixing screws (2 pcs).
2. Disconnect the couplers (V1).
3. Remove the V-Board.

7.13. Speaker

1. Remove the fixing screws (8 pcs).

2. Remove the Speakers (left and right).

7.14. Main chassis Ass'y

1. Remove the fixing screws (3 pcs).
2. Disconnect the couplers.
3. Remove the Main Chassis Ass'y.

7.15. LCD Panel

LCD Panel (26")

1. Remove the Main Chassis Ass'y. (See 7.13)
2. Remove the fixing screws (7 pcs).
3. Remove the LCD mount MTG (top, bottom, left, right).
4. Disconnect the couplers.
5. Remove the LCD Panel.

LCD Panel (32")

1. Remove the Main Chassis Ass'y. (See 7.13)

Location of Lead Wiring (32")

9 EMI Processing

EMI Processing (26")

EMI Processing (32")

10 Service Mode Function

MPU controls the functions switching for each IC through IIC bus in this chassis. The following setting and adjustment can be adjusted by remote control in Service Mode.

10.1. How to enter SERVICE 1

1. Set OFF TIMER to 15,30.....
2. Set VOLUME to MINIMUM. Press the F button on the TV set to select VOLUME, simultaneously press RECALL button on remote control and DOWN button [v] on the TV set.

10.2. How to enter SERVICE 2

1. Select the "Sub-Brightness" under Service 1.
2. Simultaneously press MUTE button on remote control and DOWN button on the TV set.

Note:

To exit to Service mode, press N button or POWER button on remote control.

SERVICE 1

SERVICE 2

Key Command

SERVICE 1

- Press the **RED/GREEN** button to step up/down through the functions.
- Press the **YELLOW/BLUE** button (or **VOLUME UP/DOWN** button) to change the function values.
- Press the **STR** button after each adjustment has been made to store the required values.

SERVICE 2

- Press the **RED/GREEN** button to select the Option.
- Press 1 or 2 button to select the bit.
- Press **VOLUME UP/DOWN** button to change the bit, 0 or 1.
- Press the **STR** button after each Option code has been changed to store.

11.3. DVCO adjustment

Instrument Name	Connection	Remarks
Remote controller	RF input	
Internal signal (studio color bar)		
Procedure		
DVCO Adjustment		
1. Receive the color bar pattern at AV1 composite video. Signal generator : PAL/ fp =4.43361875MHz (ref.)		
2. Go to "DVCO" under Service 1.		
3. Make automatic adjustment of DVCO by the blue key. (About 3sec.) The display color of DVCO serves as black (START) - red (under adjustment) - black (completion).

13 Block and Schematic Diagram

13.1. Schematic Diagram Notes

Important Safety Notice

Components identified by $\triangle$ mark have special characteristics important for safety.
When replacing any of these components, use only manufacture's specified parts.

Notes:

1. Resistor

All resistors are carbon 1/4W resistor, unless marked as follows:
Unit of resistance is OHM [Ω] (K=1,000, M=1,000,000).

$\bigcirc$: Nonflammable	$\boxtimes$: Metal Oxide
$\triangle$: Solid	$\odot$: Metal Film
$\boxplus$: Wire Wound	$\otimes$: Fuse:

2. Capacitor

All capacitors are ceramic 50V capacitor, unless marked as follows:
Unit of capacitance is μ F, unless otherwise noted.

$\otimes$: Temperature Compensation	$\begin{array}{c} + \\ \text{---} \text{---} \text{---} \\ \text{---} \end{array}$: Electrolytic
$\textcircled{M}$: Polyester	$\begin{array}{c} \text{NF} \\ \text{---} \text{---} \text{---} \\ \text{---} \end{array}$: Bipolar
$\textcircled{m}$: Metalized Polyester	$\textcircled{T}$: Dipped Tantalum
$\boxtimes$: Polypropylene	$\textcircled{Z}$: Z-Type

3. Coil

Unit of inductance is μ H, unless otherwise noted.

4. Test Point

$\bigcirc$: Test Point position

5. Earth Symbol

$\text{---} \text{---} \text{---}$: Chassis Earth (Cold) $\downarrow$: Line Earth (Hot)

6. Voltage Measurement

Voltage is measured by a DC voltmeter.

Conditions of the measurement are the following:

Power Source	AC 220V-240V, 50/60Hz
Receiving Signal	Colour Bar signal (RF)
All customer's controls	Maximum positions

7. Number in red circle indicates waveform number.

(See waveform pattern table.)

8. When arrow mark ($\nearrow$) is found, connection is easily found from the direction of arrow

9. Indicates the major signal flow. : Video $\Rightarrow$ Audio $\Leftrightarrow$

10. This schematic diagram is the latest at the time of printing and subject to change without notice.

Remarks:

- The Power Circuit contains a circuit area which uses a separate power supply to isolate the earth connection.
The circuit is defined by HOT and COLD indications in the schematic diagram. Take the following precautions.

All circuits, except the Power Circuit, are cold.

Precautions

- Do not touch the hot part or the hot and cold parts at the same time or you may be shocked.
 - Do not short- circuit the hot and cold circuits or a fuse may blow and parts may break.
 - Do not connect an instrument, such as an oscilloscope, to the hot and cold circuits simultaneously or a fuse may blow.
Connect the earth of instruments to the earth connection of the circuit being measured.
 - Make sure to disconnect the power plug before removing the chassis.
- Following diodes are interchangeable.

Important Safety Notice

Components identified by Δ mark have special characteristics important for safety.
When replacing any of these components, use only manufacturer's specified parts.

RTL (Retention Time Limited)

Note: The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.
